NFPA 701 Compliant Tent and Canopy Manufacturers

When renting or purchasing a tent for commercial use the Office of the Fire Marshal requires that the tent or canopy be compliant to NFPA 701. This national standard determines a material's flame resistance.

Before purchasing or renting inquire with the retailer or manufacturer if the tent or canopy is compliant to NFPA 701.

Below are a few of the manufacturers and retailers that sell and rent compliant tents and canopies. This is not an all-inclusive list and HCDFRS does not endorse any particular retailer or manufacturer.
